The following comments were AGREED:

All previous comments stand. However, the Parish Council would wish to clarify in this instance that flood potential, in the village of Whissendine, arises due to discharges into the floodplain north of the village via the western stream upstream of the Melton flood-control works. Once over-topping on the floodplain occurs this causes the flow to back up the Whissendine Brook into the center of the village. This section of the stream overtops across the road, 4-6 times a year on average.
